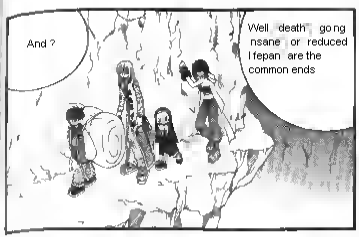
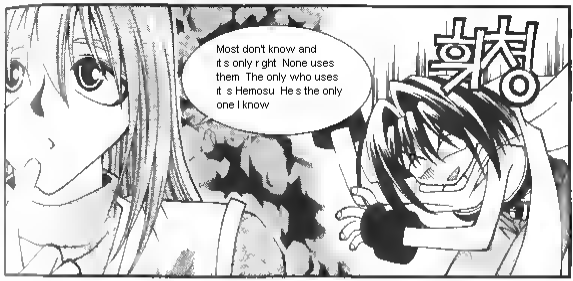
Isn't it like a magical sword?
You've seen Hemosu's sword right? it's one of the cursed swords A magical sword only works when the bearer has any kind of usable mana Otherwise it's just a well crafted sword
Meanwhile cursed swords have their own will and it forcefully drains mana from its bearer even if it means too much to the bearer
And after too much mana is drained from its bearer



And ?
Well death going insane or reduced Ifepan are the common ends

Seriously ? I d dn't know that cursed swords were such dangerous thng



Most don't know and it s only right None uses them The only who uses it s Hemosu He s the only one I know
